EXPERIENCE

Visa Inc.

Staff Software Engineer (Bengaluru, KA) — Oct 2024 – Present

- Spearhead **Oracle to SQL Server migration for Risk applications**, leveraging GenAI to automate repetitive migration tasks and reduce migration effort by **60%**
- Lead **code quality initiative across ~50 applications**, tracking Sonar metrics (bugs, code smells, unit test coverage) and enforcing quality checks before pull request merges to improve maintainability and regression stability
- Drive **data replication from GDC to GCP**, collaborating with engineers in Foster City to meet platform migration deliverables

Staff Software Engineer (Foster City, CA) — Mar 2024 – Oct 2024

- Established a framework to **tune Kafka consumer and producer performance** using runtime metrics, Jupyter analysis and Grafana dashboards, enabling data-driven optimization of streaming pipelines
- Collaborated with architects and product stakeholders to align **Kafka based solutions with evolving platform requirements**

Senior Software Engineer (Foster City, CA) — Oct 2021 – Mar 2024

- Architected a **Kafka consumer framework enabling streaming data integration** from multiple applications into heterogeneous data sources
- Designed and developed **React based UI components** in the Enterprise Business Center product enabling customers to manage transaction lifecycle including acceptance, settlement, rejection and reversal
- Designed **RiskUIServices**, a Spring Java Vert.x backend service enabling asynchronous calls to multiple downstream systems

eQ Technologic Inc. — Pune, India

Senior Software Engineer — Apr 2019 – Aug 2019

- Delivered the **Links feature in eQube BI**, enabling inter product navigation across 10 widgets by defining requirements, architecture design artifacts and implementation within an agile release cycle
- Improved www.1eq.com performance by **70% (Google PageSpeed)** by redesigning the responsive UI architecture

Software Engineer — Jul 2016 – Apr 2019

- Delivered a web-based PLM application interface within three months, contributing to additional customer engagements
- Built a **single page application for security services a** and integrated frontend optimization into the Maven build pipeline improving page load performance by **50%**
- Developed an Android application to centralize campus hiring workflows for interviewers

EDUCATION

Oregon State University — Corvallis, OR

Master of Science in Computer Science (minor in Artificial Intelligence) — Sept 2021

College Of Engineering Pune (COEP) — Pune, India

Bachelor of Technology in Information Technology — June 2016

RESEARCH & PROJECTS

Master's Thesis – Learning to estimate multi-relation aggregation functions — Corvallis, OR

Major advisor: Dr. Arash Termehchy — Jan 2020 – Sept 2021

- Proposed and implemented the Bandit Join algorithm for approximate query processing with multiple relations, demonstrating faster performance than block-nested loop join in generating confidence intervals for aggregate functions

Bachelor's Thesis – Intelligent Traffic Signal Synchronization Using Fuzzy Logic and Q-Learning — Pune, India

Major Advisor: Dr. Jibi Abraham — Jun 2015 – May 2016

- Proposed self-learning multi-agent signal synchronization system to dynamically operate traffic signals as per vehicles' flow; published at IEEE 2016 International Conference on Computing, Analytics, and Security Trends (CAST)

TECHNICAL SKILLS

Languages: Java, Python, JavaScript

Technologies: Spring, Vert.x, Kafka, Docker, Kubernetes, Git, MySQL, React, OO JavaScript
